

The Project Management Institute Educational Foundation (PMIEF) believes that project management is a practical life, learning & professional skill that is relevant to all K-12 stakeholders, including students, teachers & administrators.

PMIEF offers a number of scholarship opportunities perfect for educators interested in developing their project management skills and knowledge for use in the classroom.

Virtual Teacher Training

The *Project Management Toolkit for Teachers™* online course is a facilitated experience that integrates the best practices of project-based learning with skills and tools for project management. The course will guide you through the Project Management Toolkit for Teachers, a resource that can be used with elementary through high school students.

The course is being facilitated by eNetLearning and offers opportunities to earn CEUs or graduate credit. Visit eNetLearning for more details!

Scholarships are available on a first come first serve basis.

Professional Development Scholarships

PMIEF professional development scholarships support professionals who wish to enhance their project management skills and knowledge. Opportunities exist for both beginner level and more advanced courses, and application deadlines occur throughout the year.

Scholarships for Students

PMIEF offers academic scholarships for students studying project management or a related field at accredited colleges and universities.

- 50+ cash scholarships that can be used wherever a student chooses to study
- Full-tuition scholarships for associate's degrees from the online University of Management and Technology.

Application Deadline is May 1
